

A QUIET MOMENT

Anxiety Relief

A simple four-step process to calm your body and steady your mind

When anxiety rises, your body needs a signal that it's safe. Move through these four steps, in order, at your own pace. There's no need to rush — this works best when you slow down.

1 PAUSE & BREATHE

Try box breathing: inhale slowly for 4 counts.
Hold for 4 counts. Exhale gently for 4 counts.
Hold empty for 4 counts. Repeat 4 times.

2 GROUND YOURSELF

Name 5 things you can see.
4 things you can touch, 3 you can hear,
2 you can smell, 1 you can taste.

3 NAME THE THOUGHT

Ask: what's the evidence for and against it?
What would I tell a friend feeling this?
Write the thought down — it loosens its grip.

4 RELEASE THE TENSION

Drop your shoulders. Unclench your jaw.
Shake out your hands, or take a short walk.
Let your exhale be longer than your inhale.

If anxiety feels overwhelming or persistent, please reach out for support.
